**SECTION IV. OPEN-ENDED QUESTION**

Statewide surveys indicate the top issue on the minds of voters in North Carolina is the economy and jobs. With that in mind, please explain your vision for economic growth and job creation.

**My Position on Economic Development**

There is no subject more important other than safety and security than jobs. Without jobs, the social costs of unemployment ravage the entire State. Families suffer, retail sales suffer, tax collections suffer, the cost of unemployment insurance rises, hospital emergency rooms are overburdened as people lose health insurance and even crime increases. Society cannot function without good paying, steady employment. We have seen first hand in the last year what happens as unemployment rises. To add to the human misery, we have seen retail sales drop and with that the sales taxes that fund so much of our State and county budgets. We need to do everything we can to encourage businesses to hire, especially in the high poverty, high unemployment counties. That includes tax incentives for hiring, expanded training that is aimed at immediate employment, and a more aggressive Job Development Investment Grant (JDIG) program. I would favor more liberal percentages (up to 75%) and longer terms (up to 12 years) for any county with a poverty rate greater than 125% of the State average and unemployment of more than the State average.
