SECTION IV. OPEN-ENDED QUESTION

Statewide surveys indicate the top issue on the minds of voters in North Carolina is the economy and jobs. With that in mind, please explain your vision for economic growth and job creation.

my vision for economic growth and job creation in North Carolina is a comprehensive one that involves radical reforms at many levels. First, we need to start by reducing the stifling tax burdens on our businesses and citizens by enacting a flat and fair tax. This will leave more disposable income, capture millions in unpaid taxes, and eliminate the favors granted to numerous special interests vis à vis the tax code. We also must reform our antiquated state bureaucracy by eliminating overlapping jurisdictions & departments. This will create more transparency, improved oversight, and eliminate millions in waste. My hope is this will create a more responsive government to the needs of the citizens. I would also propose privatizing more government services. I believe competition and specialization in the marketplace will provide these services better, cheaper, and improve customer services. Finally, education must be reformed. I would lift the cap on charter ~~schools~~ schools, provide vouchers, tax free savings accounts, credits, or deductions to families who choose alternate forms of education. This will improve test scores and provide our children with the best possible education. If we do these things we will create an atmosphere in our state that is so business friendly and citizen centered the economy and jobs will come roaring back to North Carolina.

Candidate Issue Questions & Statements

9. The state sales tax should be expanded to include personal and professional services such as haircuts, automotive repairs, legal services, and medical services.

This option should only be considered if part of a flat and fair tax consumption tax has been enacted and only if existing corporate and personal income taxes have been repealed.

23. Toll roads are a necessary part of meeting North Carolina's growing transportation needs.

Again this option should only be considered if the roads were privately constructed and/or managed. The state should not install toll roads only to collect fees and redirect them to some other part of the budget while it neglects the toll roads and provide poor service on the toll roads.
