#### **SECTION IV. OPEN-ENDED QUESTION**

My Platform contains three policy questions which if properly addressed I believe will foster economic growth and job creation. They are:

1. Eliminate undue regulations on businesses that don't address health, safety, or fraud.
2. Do away with subsidies that come at the expense of existing businesses in our state.
3. Protect businesses from frivolous lawsuits by instituting a \$500,000 cap on non-economic damages.

## **North Carolina FreeEnterprise Foundation More Detailed Responses**

### **General Business:**

4. When accessing environmental laws and regulations in North Carolina as it affects businesses I would address such issues on a case by case basis. Essentially my judgments would be driven by how such environmental actions affect those around them. If it can be conclusively proven that the actions of an industry or business are having a negative financial/health/safety impact on another entity/persons then I believe that legislators and the industry in question should work together to address that impact.

### **Budget & Taxes:**

9. I am firmly in favor of expanding the state sales tax base to include the aforementioned, but only if it is concurrent with an elimination of personal income taxes.

### **Education:**

34. It is my belief that teacher pay in our state should be more competitive however I feel significant funding can be found in reducing the administrative costs currently in the system.
