SECTION IV. OPEN-ENDED QUESTION

Statewide surveys indicate the top issue on the minds of voters in North Carolina is the economy and jobs. With that in mind, please explain your vision for economic growth and job creation.

We need across the board tax cuts for businesses and families -
not multi-million dollar sweetheart deals for select out of state
corporations. Government cannot fix our economy by "buying" jobs,
it can however create an environment that encourages business growth
and investment through tax reform which will create real private
sector jobs. I do however support some targeted incentives for small
businesses - the backbone of our economy.
~~A reasonable regulatory structure based on facts and data is critical.~~

We must invest in increased vocational education and career training.
~~Increased opportunities for students will not only help prepare
them for the workforce once they leave school, it will also significantly
reduce NC's abysmal drop out rate among those with no intention
of attending college.~~

~~Increased competition among health insurers.~~
Reduce the capital gains tax.
Investments in infrastructure.

I am a successful small business owner - I understand budget, payroll,
benefits, and insurance and I have created real jobs. I understand
small business, I am small business.
