SECTION IV. OPEN-ENDED QUESTIONS

1. A primary focus of the U.S. Congress this past year has been to reform health care and health insurance in the United States. Please briefly explain your recommendations for reform and the roles of the government and private sector in your proposal.

We have the best healthcare in the world. We need only to make adjustments to our existing H.Care coverage; limit the amounts on law suits rewarded; open state borders, thus allowing competition between insurance companies, whistleblower compensation for fraud alerts, Insurance premiums should be deductible for the employees, and the coverage should be portable, and not dependable on a certain job. Defensive medicine costs have to be discussed with the patient as to what procedures are really needed and what are done because of possible lawsuits if not performed. We don't need a Government controlled health care system; nor does the public want it. Lets not destroy the wagon when we need only fix a wheel

2. Statewide surveys indicate the top issue on the minds of voters in North Carolina is the economy and jobs. With that in mind, please explain your vision for economic growth and job creation.

The number one concern in North Carolina is jobs and of course the economy. We need jobs now; and you don't stimulate the economy to produce employment opportunities by raising taxes; actually just the opposite. We need to cut taxes at least by 50% for small business and employees. Eliminate corporate taxes and the death tax. The Fair tax should be adopted as our tax system in the United States. We have oil reserves off the ~~sea~~ coasts of North Carolina and exploration should begin immediately. Also, we need to build oil and gas refineries. Jobs will result. A demand for parts and equipment for the oil and gas industry will emerge and all the empty warehouses in North Carolina (as a result of textiles moving) could be utilized for manufacturing.
